Page: intro

Please think for a moment about your close friends and family. You might discuss important matters with these people, or socialize with them regularly on the weekends. You might ask them to watch your house if you are away, or they might be the people who would help you if you were sick or needed help. These are people whom you would stay in touch with, even if you lived far away. Neighbours, co-workers, former schoolmates and people you met through social, political or religious activities may also fall into this social circle; although you will usually know something about their life outside this specific activity.

Please think for a moment about your extended network of friends and family. These are people whom you see on a fairly regular basis, or did see regularly in the past. These may be people on your list for holiday or birthday cards, or people you would be likely to invite to a large party or wedding. Neighbours, co-workers, former schoolmates and people you met through social, political or religious activities may fall into this social circle.

Please think about all of the people you currently know or have known well enough to greet when you see them. These may be the people you greet by first name if you ran into the person on the street or in a shopping mall, people you've met only briefly, or people you keep up with through friends or acquaintances even if you rarely see them. Friends, family, neighbours, schoolmates, co-workers and people you met through social, political or religious activities all fall into this social circle.
